EFFECTIVE COMMUNICATION IN CLASSROOM

Communication is on act of transferring or exchanging information from one place, person or your of people to another. In other words, it means sharing information or ideas by talking or writing and receiving information by listening or reading. Tommunication plays low important evole in human life and society. Along with exchanging information and knowledge, it also helps in building relationships with other people. The word "Gommunication has been descred from the Later noot " Communis? which means Common They, communication meany common thought, common feelings and commod understanding. Communication establishes relationships and makes organizing possible. Every musage has a purpose or objective. The senden intends whother consciously or unconsciously to accomplish something by communicating. Communication plays a very important part in our daily lives

Without communication, we wouldnot be able to express ownselves or relay information. It is also important to understand others, to develop social skills and build human relationships. Exallent Communication skill lead to good conversations and help in building story and lasting relationships. Effective communication is ourcial for the success of an institution. Being an effective communicator in one professional and personal lines involves learning the skills to exchange su for mation with clarity, empathy and understanding when me communicate effectively, both the sender and necessar feel satisfied. Communication occury in many forms, including norbal and non-verbal, written visual and listening . It can occur in power, on the internet (or forums, social media and web sites), once the phone (through apps, calle and videos) or by mail There all are the ways to communicate tack of the category has its own method and way to make the communication effective. Newsal Communication is method what was speech in the form of to convery a message or information

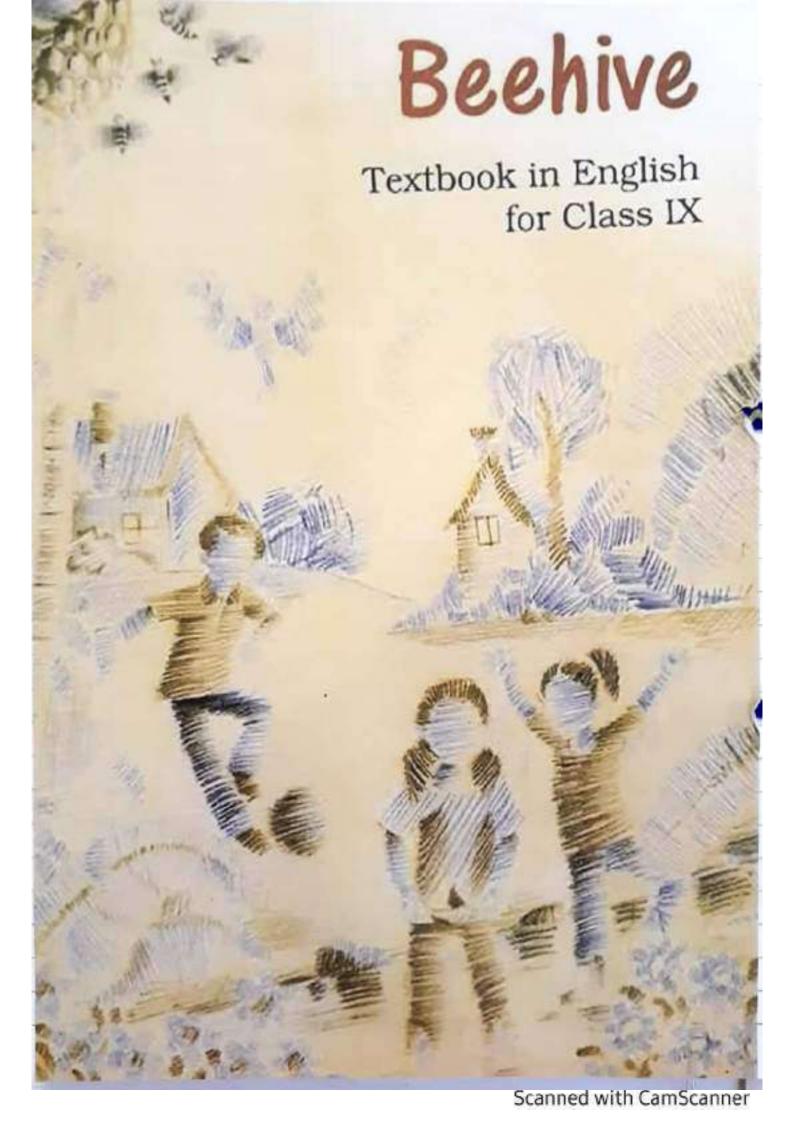

_ D

Tools,

It is the most popular and effective mode of communication usually practiced during one on one conveyation, class room interaction, meetings and conferences Non- Neusal Communication & basically a practice of gestives, fairal expressions ourd body longuage to send information. Written Communication & all about typing, printing, symbols, mintous, lettere and writing to send a piece of Information. affective communication in the classroom is important in teaching and learning. It makes learning easier and helps students to achieve learning goals. Effective communication com strengthen the relation between students and teachers. It allows the tracker and students to share their ideas, feelings and knowledge. Effective classroom communication is the mark of good teaching. Indente lone a teacher who is to the point while presenting different aspects of a lesson. A teacher who beats about the bush to pass the only leaves his students An confusion. There, while communicating with the colleagues or students in classeroom on the parents, the teacher

serould be open-minded, receptive and to-the-point. communication & a two-way process. There are certain barriers that adversely affects communication. The distance between the sender and the ruceiner of the mesage is an important barrier to communication. Personal factors like difference in judgement, social value, influiority complex, bias, attitude, pressure of time, inability to communicate etc widens the psychological distance between the communicator and the communicates . There may be many barriers such as undarified assumptions, lack of ability to communicate, communication overland, shortage of time, premature evaluations basevious due to inadequate attention, emotional attitude, language barreners etc. which cause distortion or obstruction in the free flow of communication and three make it ineffective. To making communication effective or orunothing these barriery, there should be clarity and completeness. Proper larguage should be used to avoid to avoid Semantic barriers, Simple brief and clean language should be used.

Topic Toachers should use proper and redevant words to make the communication effective. Students also enjoy if the communication is effective on the classroom To conclude, we can say that the success of class own communication lies in ernabling the students to apply the Imow ledge opined and develop critical thinking to that they are able to make inforked choices for the common good of society and humanity.

ARTICLE FOR COLLEGE MAGAZINE (IMPACT OF SOCIAL MEDIA ON MENTAL HEALTH)

social media has become on integral part of our lives, with millions of people using various platforms to connect with each other and share information. While social media has its bene fits, it is also associated with several negative effects, including its impace on mental health Studies have shown that the excession we of social media can lead to various mental health problems, including anxiety, depression, low self- exteen and poor body image. One of the measone for their is the constant comparison that take place on social media. People offen present on idealized unrealistic expectations for others and lead to feelings of

inadequacy: Social media can also be addictine, with people spending and engaging with content. Terce can lead to sleep deperivation, which can have a nigative impact on mental health. In addition, soval media com be a source of cyber bullying, which can a particularly downaging to young people. Another way, social media com impact mental health is through the spread of multinformation. Social media has become a breeding ground for conspiracy theories and false information, which can lead to feelings of confusion and anxiety Despite these negative effects, sound media can also be a source of support and connection for people. It can provide a platform for people to connect with other who share similar experiences and com offen support during difficult times. Social media can also be used to vaise awareness about mental health issues and promote positive messages. There is a growing evidence Mari

that social media use can loane negative imparts on mental health, particularly in nelation to ouriety, depression and self-esteem. Social media platforms can create environment where users themselves to others, leading to feelings of Enadequary and low selfesteem. For example, seeing, friendes posts about their vacations or activements can make people feel like they are missing out for not doing enough. Social mestia can also provide a platform for apperbullying which com be incredibly brannful to mental health. It is use can become leading to a lose of productivity and increased stress. Social media can weate unrealistic expectations of what life should be like, Leading to feelings of disappointment. In conclusion, while south media can have i'ts benefits, i't is suportant to be aware of its potential negative effects on mental health. It is suportant to use social media in moderation and to be mondful of the content we consume

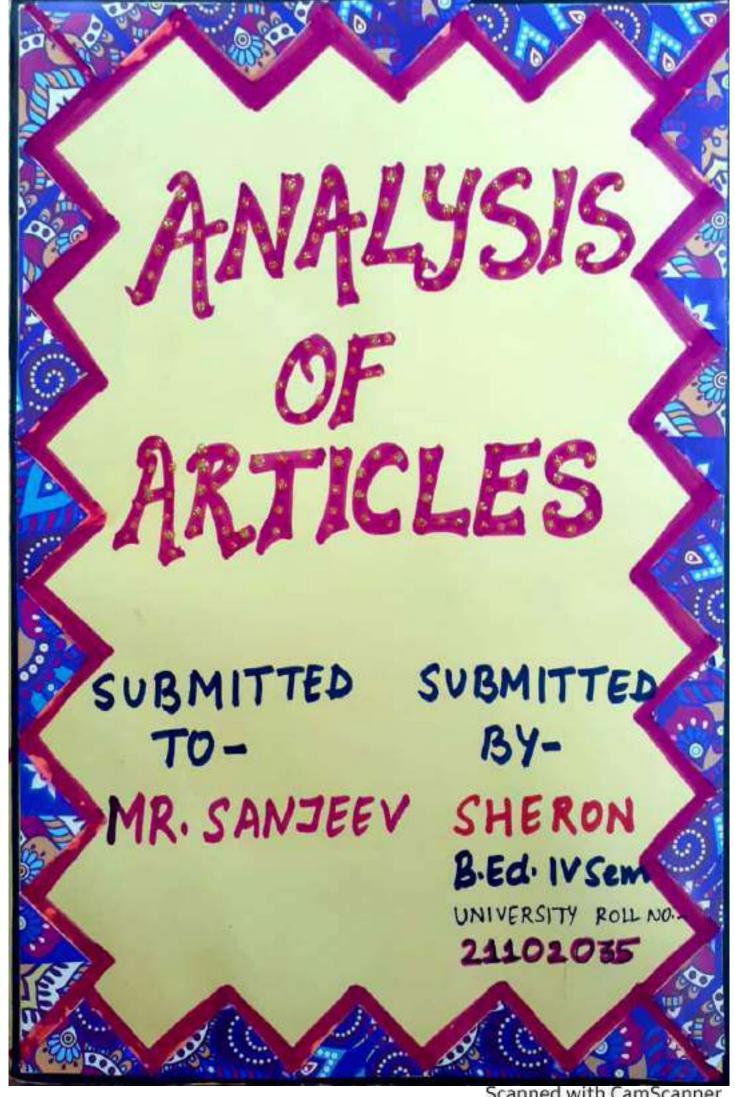

VIRTUAL LEARNING ENVIRONMENT (ARTICLE)

A virtual learning environment (VLE) is a web based platform for the digital aspects of courses of study, usually within educational institutions. They represent resources, activities and interperovide different stages of assessment Virtual Learning Environment usually report on participation and have some level of integration with system. In North America, Virtual Learney environment is often suferred to as I "Learning management system (145) Virtual hearing Environment have been adopted by almost all by her education Institutions on the English speaking world allow for the delinery of educational

materiale and facilitate communication between studente and teachers. They have become increasingly popular in weint years at more and more institutions have moved towards online learning. A Virtual barney Environment typically consists of a set of tools that enable the Instructors to meate and manage online rowises. *VIE's allow the instructors to upload and organize cower materials such as lecture nota videos and other recources. This enables the students to access these materials at any time and from any where. NLE's phoride a range of tools to facilitate communication between students and instructore, including e mail, alucussion forums and chat grooms. These tools enables the students to ask questions participate an discussions and necure feedback from instructors. VLE'S also provide tools for Instructors to weate and grade assignments and assistments, such as grigges and exame. These took also allow the instructors to track the students progress and provide fuedback on the performance. VLE's one helpful on

providing took for collaboratine learning such as group purjects and online obscussion forume. There tools enables the students to work together and learn ferom each other, even when they are not in the same phyeral location. VLE's provide students with the flexibility to learn at their own pace and on their own schoolile. This is particularly berreficial for the students who work or have other commitments that make it difficult to outland traditional classes. It allows the students to access course materials and resources from any where with an Enternet connection. This makes education more assessible to students who line in memor anex or who have mobility or other disabilities. Virtual diarning Environment provide students with a hange of Bute ractione and multimedia learning necources, such as videos, simulations and interractine grizzes. These resources can help to Provease students engagement and motivation. It allows the Instructors to customize their courses to meet the specific needs and Portonests of their stridents. The can lead to

a personalized learning experience and better out comes. spart from this, there are money challenge and Unitations of Virtual learning environment. It inequires a reliable buternet connection and a certain level of technical proficiency from both instructors and students. Technical issues such as slow Enternet speeds or incompatible hardware com impact the quality of the learning experiences. VIEW can be solatery for the students as they do not provide the same level of personal enteraction as traditional clasuroom setting. This com Impact student motivation and engagement. Developing and main-- tolining a VLE com be expensione, particularly for smaller institutions or those with limited resources. Idapting to a virtual learney environment con be challenging for both the Instructors and the students. It can take time to denelop the skills and strategice needed to succeed in a Virtual learning environment-Virtual learning environments have become an inclasingly important

If crop loss more than 75%, farmers to get ₹15K/acre

SANTHEV SINGH HARIANA

CHANDOGARD, MARCH 26

Rollowing visit to different parts of the state for assessing the crop loss to farmers, Chief Minister Bhagwart Mann on Sunday announced a 25 per cent upward revision in the compensation for the crop loss to the farmers.

If the loss is more than 75 per cent, they will get 15,000 per acre and if the loss is between 33 per cent and 75 percent, then the farmers will get Rs 6,750 per acre. The Chief Minister said labourers would be paid 10 per cent of the crop loss per acre. The CM also made an announcement of Rs 95,100 as the compensation for those witnessed a total loss to their houses. Those whose houses suffered minor damages will be paid Rs 5,200.

Mann visited villages in Moga, Sri Mulctear Sahib, Bathinda and Patiala to assess the damage to crop due to min.

President of the Bharti Kisan Union Balbir Singh Rajewal said, "Under the rules, a farmer, who suffer crop loss between 25 per cent and 50 per cent is given Rs 6,006 per acre. between 50 per cent and 75 per cent Rs 8,000 and for the total crop loss Rs 12,000 per acre. Partners have been speaking for the amounts being less in comparison to their actual losses and the government should revise accordingly." Mann said the government was committed to safeguarding their interests against nature's fury

- CM visits Moga, Muktsar Sahib, Bathinda and Patiala districts to assess crop damage

Relief within 10 days: CM

MUKTSAN, MARCH 26

Chief Minister Bhagward Mann today visited the Lambi segment and assured farmers that they would get compensation in 10 days for the losses to their crops due to rain.

The Chief Minister said the compensation would be given to the farmers through the direct benefit transfer (DBT) system in their bank accounts. He also announced that farm labourers and daily wage earners, who were dependent on wheat crop, would also get the compensation.

Besides, those who suffered loss to their livestock and buildings would also be covered under the special girdawari, he said.

"I have directed all Deputy Commissioners to give me the report of special girdawari within 10 days so that the compensation could be given by April 6-7. If someone has taken the land on lease, he/she will also get the relief The district administration will ask the villagers about the cultivators. Teams, conducting special girdswan, will make an announcement in village gurdwaras," said Mann at Dabwali Dhab village here. Some farmers also raised the issue of the cana water supply. -TNS

INTRODUCTION

Propile differ in the degree to which they possess confidence and hope that future events will turn our positively. Positive psychologists are particularly interested in the attitude of optimism because whether we bring a stable sense of optimism to situations flows on to uffect our thoughts, feelings, and actions across a range of domains.

POSITIVE LIFE ORIENTATION

Positive life orientation is not only a much broader term than optimism, it is, in fact, different from optimism, and it is important to note and understand this difference. Optimism is understand as a generalized expectancy and an anticipated positive evaluation of future events. Positive life orientation can be differentiated from optimism on both these accounts. In the current conceptualization, Positive life orientation refers to a general tendency of purchive construction of reality in the present. It is said that every situation has two sides, a positive and a negative; positive orientation is the tendency to focus on the positive side of the situation more than the negative side. Positive attitude is considered the most important lactor that brings constructive changes in one's life, and makes them happier, brighter and more successful. There is a paucity of tools to measure positive attitude and thinking. Whether or not we are optimistic in our nature tends to depend on both our genetic predisposition, environmental factors, and learned anitudes throughout our lives. And although psychologists are not entirely in agreement regarding the factors that produce dispositional optimism, most will agree that an optimistic outlook serves us better throughout life than a pessimistic one.

In particular, Scheier and Carver (1985) sought to understand the implications of such stable arritudes for the positive regulation of behaviour, particularly in the context of health.

However, observing that there had previously been little research on the concept of optimism as an antecedent to health-related behaviors, there appeared to be a significant gap in the literature. So, as a starting point, the authors began by designing their own measurement instrument. Scheier and Carver attributed optimism was indistinguishable from those predicted by traits associated with neuroticism, such as anxiety (Smith, Pope, Rhodewalt & Poulton, 1989).

Divergent production ability

"The ability to generate multiple solutions to a problem; creativity". Divergent production is directly associated with divergent thinking. We have to understand divergent thinking first.

Divergent thinking

Guilford first proposed the concept of "divergent thinking" in the 1950s, when he noticed that creative people tend to exhibit this type of thinking more than others. He thus associated divergent thinking with creativity, appointing it several characteristics:

- (i) fluency (the ability to produce great number of ideas or problem solutions in a short period of time);
- (ii) flexibility (the ability to simultaneously propose a variety of approaches to a specific problem);
- (iii) originality (the ability to produce new, original ideas);
- (iv) elaboration (the ability to systematize and organize the details of an idea in a head and carry it out).

Guilford believed that standard intelligence tests do not flavor divergent thinking, working better for convergent thinkers:Convergent thinking is a term coincid by Guilfords the opposite of divergent thinking. It generally means the ability to give the "correct" answer to standard questions that do not require significant creativity, for instance in most tasks in school and on standardized multiple-choice tests for intelligence. Divergent thinking typically occurs in a spontaneous, free-flowing manner, where many creative ideas are generated and evaluated. Multiple possible solutions are explored in a short amount of time, and unexpected connections are drawn. After the process of divergent thinking has been completed, ideas and information are organized and structured using convergent thinking to decision running strategies are used leading to a single-best, or most often correct answer Examples of divergent thinking include using brainstorming, free writing and creative thinking at the beginning of the problem solving process to generate possible solutions that can be evaluated later. Once a sufficient number of ideas have been explored, convergent thinking can be used.

Knowledge, logic, probabilities and other decision-making strategies are taken into consideration as the solutions are evaluated individually in a search for a single best answer which when reached is unambiguous. On the basis of his Model Guilford gave six divergent production abilities (deational fluency, associational fluency, expressional fluency, spontaneous flexibility, originality and semantic elaboration. In the later works few more abilities, like word fluency and adaptive flexibility were also added.-In his Model of Simucture of Intellect, Guilford gave six types of products: units, classes, relations, systems, transformations, and implications which the mind gives after it works with raw materials or contents. Identional fluency is product as units spontaneous flexibility associational fluency is product as relations, expressional as systems, originality is product as transformations, and elaboration is product as implications. Word fluency and adaptive flexibility are products as classes respectively. Word fluency is to give more words to stimulus. Words may be synonyms or antenyms as asked for. It is more a vocabulary test phrase, sentence, story, quality or any idea etc. product Ideational fluency is generation of more ideas to stimulate, maybe word Expressional fluency is to produce many ideas to fit a system or logical theories. may be in the form of sentences or verbal ideas etc. Associational fluency is to produce ideas or words from a restricted area i.e. of relationship. It requires completion of relations, like production of relations, generation of synonyms, analogies, similarities, problem of likeness etc. Spontaneous flexibility is preduction of a diversity of ideas in a relatively unrestricted situation. It may include a variety of kinds of responses into classes like numbers of considerations, or properties, attributes, or inherent characteristics, problem or product, number of shifts of category responses, versatility etc. Some psychologists do not regard this psychometric approach of Guilford because it becomes scattered and complex. They still prefer a global approach of calling creativity rather than divergent production abilities. However, their relationship is clear. Most psychologists regard that creativity is a product of fluency. flexibility and originality; some add elaboration to it; while some are rigid to use only originality as akin to creativity. In spite of it is almost agreed that by whatever means these dimensions are obtained, creativity must be represented by more than one, out of which originality is exceptiality.

COGNITIVE DISSONANCE

Cognitive Dissonance is a theory in social psychology. It refers to the mental conflict that occurs when a person's behaviour and beliefs do not align. It may also happen when a person holds two beliefs that contradict one another. The psychologist Leon Festinger published his

theory of cognitive dissonance in his 1957 book. A Theory of Cognitive Dissonance, Pestinger proposed that people experience discomfort when they hold conflicting beliefs or when their actions contradict their beliefs. Since then, cognitive dissonance has become one of the most influential and researched theories in usual psychology. People will try to reduce this dissonance to relieve the discomfort. The drive to resolve dissonance is called the "principle of cognitive consistency." It is important to note that cognitive dissonance is not automatic when a person holds opposing beliefs. They must have an awareness of the inconsistency to feel discomfort. Not everyone experiences experience dissonance to the same degree. Some people have a higher tolerance for uncertainty and inconsistency and may experience less cognitive dissonance than those who require consistency. Other factors that affect the degree of cognitive dissonance that a person experiences include:

- The type of beliefs: Beliefs that are more personal lead to more significant dissonance.
- The value of the beliefs: Beliefs that people hold in high regard tend to cause greater dissonance.
- The size of the disparity: A substantial disparity between conflicting and harmonious beliefs will result in more dissonance.

REVIEW OF RELATED LITERATURE

1.Positive Life Orientation

A review of literature shows documented research on positive orientation, towards life events, mainly understood to consist of life satisfaction and optimism (Caprera and Steca, 2005).

Studies Related To Positive Life Orientation

There has not been much evidence among positive life orientation among senior accompany actual students, however few studies related to positive life orientation are mentioned.

Agrawal and Agrawal (1995) in their research work show that the relationship between Positive life orientation and patients with medical condition was examined and positive life orientation contributed to recovery from myocardial infarction through higher expectations of recovery, greater sense of personal control, and more positive mood states in adverse situations.

Supervia, Bordas and Lorente (2012) in their research work explored the psychological effects of optimism on life satisfaction among students. The results of the study reveal significant correlations between optimism-related variables, goal orientation and life satisfaction.

Aghaci. Khayyamnekouci and Yousefy(2020) conducted survey on general health prediction based on life orientation, quality of life, life satisfaction and age among males and females of 20-45 years of age group and it was concluded that in order to promote physical and psychological health of individuals, one should prepare the required backgrounds considering an optimistic orientation toward life, required measures for promoting the life satisfaction.

Kour(2022) conducted another survey regarding life satisfaction and optimism among private school teachers and government school teachers of North India. The results of the study reveal that there is significent small positive relationship between life satisfaction and optimism of school teachers of North India and thus hypothesis has been necepted.

2.Divergent Production Abilities

Yamada and Nagai (2015) in their research work show that a positive mood enhances divergent thinking, but does not affect convergent thinking. The results of the study showed that participants in the positive mood group generated more unconventional or divergent ideas than did mose in the neutral mood group. No differences were found in conventional or convergent ideas between the two mood groups.

Balgui and victor(2014) In their research obtained no correlation between creativity and its parameters and academic achievement. However, for lower levels, they obtained correlations between verbal originality and achievement and verbal elaboration and achievement. The insults of the paper corroborate the findings in other pieces of research which show that there is no correlation between creativity and academic performance.

3. Cognitive Dissonance

Jewica C. Miklosovio(2010) perceived choice would induce attitude change as a method of cognitive dimensione reduction was investigated in a between-groups design. A one-way analysis of variance yielded results supporting the hypothesis that greater perceived choice induces attitude change as a method of dissonance reduction.

Sukmayadai and Yahya(2020) attempted to provide an overview of the classic theory by exploring the core assumptions of the theory, causes of dissonance, and the theoretical implications in current social issues.

RATIONALE OF THE RESEARCH

It is a general observation that there are many students who are divergent thinkers and creative and while they struggle psychologically so positive motivation is needed because there has also been a lock of motivation provided to the students in order to move beyond certain fixed rules and be creative in whatever aspects they are comfortable with. Children, if feel positivity towards life then they may able to explore more and excel better in life.

Similarly when there are conflicts in one's thoughts and heliefs then positive psychology surely guides them in the right direction. These has never been optimum research on the effect of positive life orientation which is a part of positive psychology on divergent production abilities as well as cognitive dissonance. So the researcher took this challenge.

The purpose of the present study is to determine the effect of positive life orientation on divergent production abilities of individuals and their cognitive dissonance of senior secondary school students.

STATEMENT OF THE PROBLEM

EFFECT OF POSITIVE LIFE ORIENTATION ON DIVERGENT PRODUCTION ABILITIES AND COGNITIVE DISSONANCE OF SENIOR SECONDARY SCHOOL STUDENTS

OBJECTIVES OF THE STUDY

1.To study the effect of Positive Life Orientation on divergent production abilities of senior secondary school students.

2.To study the effect of Positive life orientation on Cognitive Dissonance of senior secondary school students.

HYPOTHESES

1(H0)There exists no significant effect of positive life orientation on Divergent Production abilities of senior secondary school students.

(H1)There exists a significant effect of positive life orientation on Divergent Production Abilities of senior secondary school students.

2(110) There exists no significant effect of positive life orientation on Cognitive Dissonance of senior secondary school students.

(H1)There exists a significant effect of positive life orientation on Cognitive Dissonance of senior secondary school students.

RESEARCH DESIGN

Experimental Design consisting of controlled and experimental groups will be used in this study. For this purpose a pre-test will be conducted among 50 class 11 students. Pre-test of divergent production abilities and cognitive dissonance will be given to class 11 students. Scores will be equated and they will be further divided into two groups -experimental group and control group. Positive life orientation will be delivered to the experimental group for 15days and ordinary teaching will be done with the Control group during these 15days. At the end of the experiment, post-test will be given in divergent production abilities and cognitive dissonance to verify the effect of positive life orientation, among the students of both the groups.

SAMPLE

A representative sample of 50 students will be drawn at the initial stage from eleventh class of government school in Chandigarh based on random stratified sampling techniques. The student constituting sample will be nearly equated on the basis of pre-test. A sample of 50 students nearly equating on these scores will be selected for future study. These chosen 50 students will be divided into two groups of 25 each forming a control and experimental group.

TOOLS

The main data will collect with the help of a standardised test to

1)Positive Life Orientation-Experimental Modules

2)Divergent production abilities (DPA) by Sharma(2011)

3)Cognitive Dissonance by Bhagwas(2009)

DATA COLLECTION

The data from the selected sample will be collected personally by the investigator after taking due permission from the principal of the school.

Pre-test- At this stage, pre-test will be administered to 50 students in the Divergent production abilities test and cognitive dissonance test. The scores will be equated and controlled and experimental groups will be formed.

Teaching sessions. At this stage, positive life orientation training will be resorted to the experimental group for fifteen days and ordinary teaching will be done during this time with the control group.

Post-test- The same test of Divergent production abilities and cognitive dissonance will be administered to the students of both the groups as given at the pre-test stage.

The testing conditions for all the students will keep as constant and uniform as possible before the teaching session will ensure that the subject will be seated comfortably and there will be no disturbance.

STATISTICAL TECHNIQUES

Descriptive and Inferential Statistics will be used as per the need.

DELIMITATIONS

Study was delimited to senior secondary school students studying in Chandigarh only.

Report

Central State Library, Sector 17 Chandigarh: A Gateway to Knowledge and Cultural Enrichment

The Tarlok Singh Central State Library in Sector 17, Chandigarh, holds a significant place in the cultural and educational landscape of the city. On 11th May 2023 students from Tuturial Group 1-5 of Government College of Education, sector-20 D, Chandigarh visited the Central State Library in Sector 17, Chandigarh

Establishment:

The Tarlok Singh Central State Library was established on November 21, 1958, with the vision of providing a comprehensive repository of knowledge and promoting literacy in Chandigarh. The library was named in honor of Sardar Tarlok Singh, a prominent freedom fighter and the first Speaker of the Punjab Legislative Assembly.

History:

The library's history dates back to the early years of Chandigath's development as a planned city in the 1950s. The city was designed by renowned architect Le Corbusier and was intended to serve as the capital of both Punjab and Haryana states.

In its initial years, the library operated from a small building in Sector 17. However, recognizing the growing demand for educational and cultural resources, the Pinjab Government allocated a larger space for the library in the same sector.

In 1984, the library was rechristened as the Tarlok Singh Central State Library, acknowledging the contributions of Sardar Tarlok Singh to the state of Purgab. The library's name change nimed to honor his legacy and inspire future generations.

Over the years, the Turlok Singh Central State Library has undergone expansions and renovations to meet the evolving needs of its users. Its infrastructure has been continuously upgraded to provide a modern and welcoming environment for readers and researchers.

The library has played a pivotal role in nurturing a reading culture and intellectual growth in Chandigarh. It has witnessed an increase in its collection, resources, and programs to cater to the diverse interests and needs of the community. Today, it stands as a cherished institution, promoting literacy, lifelong fearning, and cultural enrichment.

The Tarlok Singh Central State Library, established in 1958, has emerged as a vital center for education, knowledge, and cultural exchange in Chandigath. Named in honor of Sardar Tarlok Singh, the library has a rich history and lias consistently adapted to meet the evolving needs of its users. Through its extensive collection, modern facilities, and diverse programs, the library continues to inspire intellectual pursuits, foster a love for literature, and contribute to the educational development of the community.

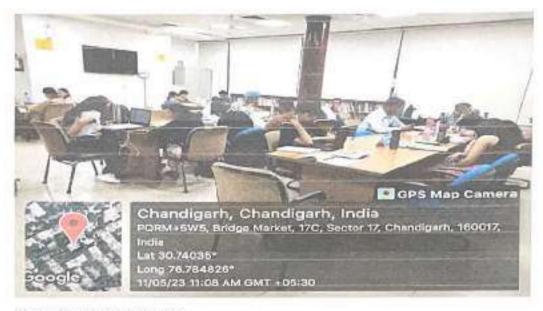

Introduction;

The Tarlok Singli Central State Library, established in 1958, has emerged as a vital center for education, knowledge, and cultural exchange in Chandigarh. Named in honor of Sardar Tarlok Singh, the library has a rich history and has consistently adapted to meet the evolving needs of its users. Through its extensive collection, modern facilities, and diverse programs, the library continues to inspire intellectual pursuits, foster a love for literature, and contribute to the educational development of the community.

The Central State Library in Sector 17, Chandigath, is a prominent institution that serves as a limb for knowledge, learning, and cultural enrichment. Located in the heart of the city, the library has been a cornerstone of the community for several years. This report provides an overview of the Central State Library, highlighting its facilities, resources, programs, and the impact it has on the local residents.

Facilities and Infrastructure:

The Central State Library boasts a modern and well-designed building, equipped with state-ofthe-art facilities to cater to the needs of its diverse visitors. The library offers a specious and comfortable environment for reading and research, with ample seating arrangements, study areas, and reading rooms. The infrastructure includes computer terminals with internet access, enabling visitors to explore digital resources and conduct online research. Additionally, the library provides facilities for photocopying and printing, ensuring convenience for users.

Collection and Resources:

The Central State Library houses an extensive collection of books, periodicals, and multimedia resources, catering to a wide range of interests and age groups. The collection encompasses various subjects, including literature, history, science, art, philosophy, and more. It features both fiction and non-fiction works, with an emphasis on local, national, and international authors. The library regularly updates its collection, acquiring new releases and addressing the evolving needs of its users. Furthermore, the library offers access to digital resources, e-books, and online databases, expanding the range of available materials.

Programs and Events:

The Central State Library is known for its vibrant and engaging programs and events that cater to the interests of the community. It organizes literary festivals, author interactions, book launches, and workshops, inviting renowned authors, scholars, and experts to share their knowledge and experiences. These events provide a platform for intellectual discourse, creativity, and cultural exchange. The library also conducts educational programs for students, including storytelling sessions, workshops on writing and research skills, and career guidance sessions. These

initiatives aim to inspire a love for literature, promote lifelong learning, and enhance personal and professional development.

Membership Automation:

The Tarlok Singh Central State Library in Sector 17, Chandigarh, has implemented membership automation to streamline the process of joining and accessing library services. The library likely employs a computerized system to manage memberships, allowing individuals to register electronically and receive a membership eard. This automation simplifies the process for both library staff and patrons, making it easier to track membership details, borrow books, and access other resources and services offered by the library.

Working Days:

The Central State Library in Sector 17. Chandigarh, typically operates on all weekdays, from Monday to Saturday. The library is closed on Sundays and public holidays recognized by the government. It is advisable to check the library's official website or contact their administrative office for specific operating hours and any temporary closures or changes in schedule.

Different Areas:

The Central State Library is organized into different areas to cater to the various needs and interests of its users. These areas may include

- Reading Areas: The library provides designated spaces for individuals to sit, read, and study in a quiet and conducive environment. These areas may have tables, chairs, and adequate lighting for comfortable reading.
- Stacks: This area houses the library's extensive collection of books, organized by subjects or categories. Users can browse through the shelves to select and borrow books.
- Children's Library: The library likely has a separate section or dedicated space for children, featuring age-appropriate books, storytelling corners, and interactive learning resources to foster a love for reading among young readers.
- Reference Section: A reference section may be available for users seeking in-depth information, academic resources, or research materials. It may include reference books, encyclopedias, dictionaries, and other specialized resources.
- Digital Resources: The library may have a designated area or computer terminals where
 users can access digital resources, e-books, online databases, and the library's online
 catalog.

Children's Library:

The Central State Library in Sector 17, Chandigarh, recognizes the importance of catering to the needs of young readers. It likely has a dedicated children's library or section that offers a wide range of age-appropriate books, magazines, and educational resources. This area have colorful and inviting spaces, storytelling corners, and interactive learning materials to engage children and promote a love for reading. The children's library also host storytelling sessions, reading clubs, and other educational programs specifically designed for young readers to enhance their literacy skills and nurture their imagination.

Digital Initiatives:

Recognizing the significance of digital technology, the Central State Library has embraced various digital initiatives to enhance accessibility and engagement. It offers online catalog access, allowing users to search and reserve books remotely. The library's website provides access to e-books, audiobooks, and digital archives, enabling users to access resources from the comfort of their homes. Additionally, the library actively engages with readers through social media platforms, sharing updates, recommendations, and organizing online discussions and contests.

Outreach and Community Engagement:

The Central State Library plays an active role in community outreach and engagement. It collaborates with schools, colleges, and local organizations to premote literacy and education. The library conducts outreach programs in underserved areas, organizing book drives and literacy campaigns to make reading more accessible to marginalized communities. It also partners with cultural and art institutions to host exhibitions, cultural events, and film screenings, fostering a sense of community and celebrating the diversity of the region.

Impact and Benefits:

The Central State Library has had a significant impact on the community in Sector 17, Chandigarh, and beyond. It serves as a beacon of knowledge, providing individuals of all backgrounds with a space to explore, learn, and grow. The library's resources and programs have enriched the lives of residents by promoting intellectual curiosity, encouraging lifelong learning, and nurturing a love for literature and culture. It has become a vital resource for students, researchers, academicians, and the general public, contributing to the intellectual and social development of the community.

Conclusion:

The Central State Library in Sector 17, Chandigarh, stands as a testament to the power of libraries and education. Through its comprehensive collection, engaging programs, and community outreach initiatives, it has become an integral part of Chandigarh's cultural fabric. By providing access to knowledge and fostering a love for reading, the library continues to play a crucial role in shaping the imellectual landscape of the city and empowering individuals to grow and thrive.

Visit to Regional Employment Exchange Office

Report

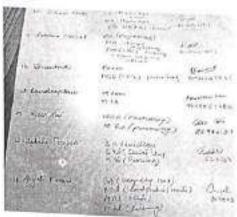

November 15, 2022

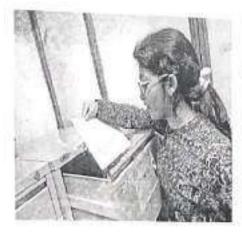

Government College of Education organized a visit to Regional Employment Exchange Office for M.Ed. 2nd year and Post Graduate Diploma Guidance and Counseling students on November 15, 2022. Total of 20 students visited the exchange. M.Ed. in charge Dr. Balwinder Kaur and Dr. Ravneet received the students at the office at 11:00m.m. An interaction and the introduction of the students took place in the Registration section, Room no. 14. Mr. Kamal Kishor, Statistical Assistant, E.M.I. briefed the students about the objectives of the Employment Exchange and how t works. He initiated his speech by mentioning that the exchange not only caters to literate candidates but also to literate candidates. He talked about the NCS (National Career Service) Portal run by the Government of India trude the Ministry of Labor and Employment with which they register their applicants and as per the demand raises her application is taken into consideration. For that, a special card is filled up in which all the basic credentials of be applicant are registered and special preference is given to the Chandigarh (local) domicile applicants through an Vadhaar Card copy. He also stated that applicants are allowed to mention their three traits, for example, computer kills, stenography, etc.

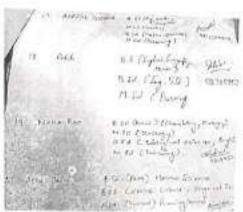

Afterward, he mentioned the Vocational Guidance cell, which is handled by the respected in charge. The in charge of this unit provides vocational guidance and employment counseling to the job seekers registered with this scharge. He brought to the notice that every employer who is employing 25 or more persons in the private sector is equired to notify their manpower requirements to the local employment exchange before filling up so that the plants registered can be sponsored. Information regarding the renewal of the card was given that is after three ears and the failure of which leads to the removal of the candidate's name from the Live Register as per the instruction of DGE&T (Directorate General of Employment). Then be took the students to the cabinets, which were pecific qualifications to make it easy to locate when in need. He added that NCO describes and assigns these codes of the various occupations in the country and aligns them with the ISCO.

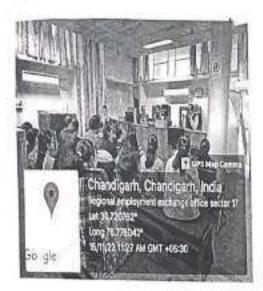

at last, Mr. Kamal Kisher answered the queries of the students and allowed the students to explore the office. The

Statement of participation

Kirandeep Kaur

has completed the free course including any mandatory tests for:

Accessibility of eLearning

This 15-hour free course explored the challenges for disabled students taking part in eLearning, alternative teaching methods and the design of tools.

Issue date: 27 December 2022

www.open.edu/openlearn

This statement does not imply the award of credit points nor the conferment of a University Qualification. This statement confirms that this free course and all mandatory tests were passed by the learner.

Accessibility of eLearning

https://www.open.edu/openlearn/education-development/education-careers/accessibility-elearning/content-section-0

Course summary

It is part of a teaching professional's skills to understand the needs of a diverse population of students. This free course, Accessibility of eLearning, introduces the challenges for disabled students who may use computers in different ways when taking part in eLearning or may need alternative teaching methods. It covers the technology and techniques used by disabled students, the adjustments to teaching methods that might be reasonable, design decisions which affect the accessibility of eLearning tools and strategies for evaluation.

Learning outcomes

By completing this course, the learner should be able to:

- discuss the main challenges facing disabled students with respect to eLearning.
- have an understanding of the types of technology used by disabled students.
- consider what adjustments you might make in creating eLearning materials to ensure they are accessible and usable.
- consider appropriate ways to evaluate the accessibility and usability of your eLearning materials.

Completed study The learner has completed the following: Section 1 Introducing accessibility and disability Section 2 A brief overview of assistive technology Section 3 Creating accessible eLearning content Section 4 Evaluation of accessible eLearning Section 5 Conclusion Section 6 Keep on learning
