

GOVERNMENT COLLEGE OF EDUCATION

SECTOR 20-D, CHANDIGARH

Report (13th SEPTEMBER 2024)

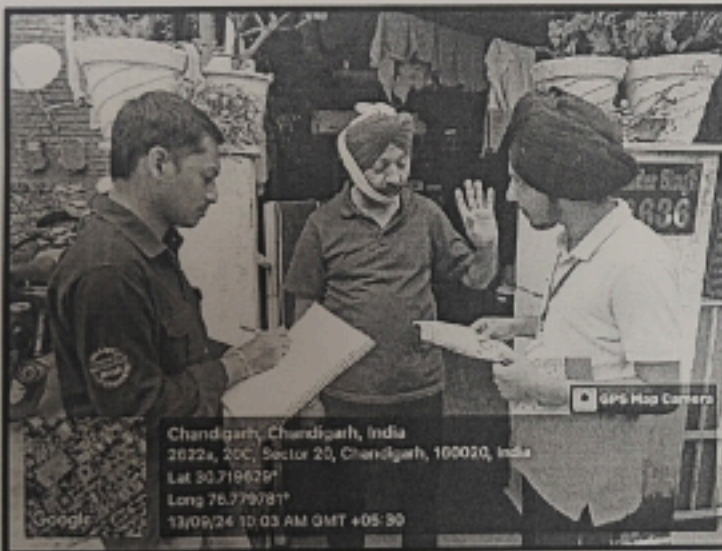

Health Awareness Campaign

The NSS Cell of Government College of Education, Sector 20-D, Chandigarh, in collaboration with Health Department Chandigarh Administration, under the leadership of Dr. Sapna Nanda (Principal) organized a Malaria and Dengue Awareness Programme campaign to educate the local community about the spread of vector-borne diseases such as dengue, malaria, and other illnesses caused by mosquitoes. The campaign organised by the NSS Program Officers, Dr. Balwinder Kaur and Dr. Aarti Bhatt, along Mrs. Gurmeet Kaur, College Nurse aimed to inform residents about the causes, symptoms, and preventive measures of these diseases, while encouraging them to maintain cleanliness to prevent mosquito breeding. NSS volunteers participated actively by going door-to-door and visiting around Eighty (80) houses including a laundry bay and neighbouring shops in Sector 20-D, Chandigarh.

During these visits, volunteers distributed pamphlets and spread awareness regarding how to avoid mosquito bites and eliminate potential breeding grounds for mosquitoes, such as stagnant water. They also emphasized the importance of early detection and timely medical intervention for mosquito-borne diseases. Residents were encouraged to adopt preventive measures like using mosquito nets, repellents, and insecticides to protect their homes.

The campaign was well-received by the community, with the volunteers successfully spreading awareness and fostering a sense of responsibility among the residents. Through this initiative, the NSS Cell made a meaningful contribution to public health, reinforcing its commitment to organizing similar outreach programs in the future to address health concerns in the community.
